

DOCKET NO.: BELL-0130/01183
Application No.: 10/008,295
Office Action Dated: April 6, 2005

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently amended) A method for processing an electronic request to purchase goods or services, the method comprising:
 - providing to a shopper, via a communications network, an electronic purchase order having an opportunity to select a notification option and provide electronic purchasing information, wherein the notification option, if selected, indicates that the shopper desires to be contacted if a triggering event that affects the performance of delivery occurs;
 - receiving from the shopper, via the communications network, the electronic purchasing information that contains an electronic request to purchase goods or services and, if the notification option was selected, optionally supplied notification information, the notification information representative of at least one communication pathway for communicating with the shopper;
 - creating a shopper profile associated with the shopper, the shopper profile containing the electronic request and the optionally supplied notification information;
 - providing the shopper with delivery information;
 - recognizing the occurrence of [a] the triggering event that affects the performance of the delivery;
 - accessing the notification information in the shopper profile;
 - if the shopper has selected the notification option and supplied the notification information, notifying the shopper that the triggering event has occurred via the at least one communication pathway; and
 - notifying the shopper of a changed delivery date.
2. (Canceled)
3. (Currently amended) The method of claim 1, wherein receiving notification information further comprises receiving one of an email address, a telephone number and a pager number.

Office Action Dated: April 6, 2005

4. (Currently amended) The method of claim 1, wherein receiving notification information further comprises receiving presence information.
5. (Currently amended) The method of claim 1, wherein the notification information further comprises a plurality of communication pathways, each pathway having a preferred rank.
6. (Original) The method of claim 1, wherein the communications network is the Internet.
7. (Currently amended) A computer having instructions thereon for processing an electronic request to purchase goods or services, the instructions performing the steps comprising:
- providing to a shopper, via a communications network, an electronic purchase order having an opportunity to select a notification option and provide electronic purchasing information, wherein the notification option, if selected, indicates that the shopper desires to be contacted if a triggering event that affects the performance of delivery occurs;
 - receiving from the shopper, via the communications network, the electronic purchasing information that contains an electronic request to purchase goods or services and, if the notification option was selected, optionally supplied notification information, the notification information representative of at least one communication pathway for communicating with the shopper;
 - creating a shopper profile associated with the shopper, the shopper profile containing the electronic request and the optionally supplied notification information if the notification option was selected;
 - providing the shopper with delivery information;
 - recognizing the occurrence of [a] the triggering event that affects the performance of the delivery;
 - accessing the notification information in the shopper profile;
 - if the shopper has selected the notification option and supplied the notification information, notifying the shopper that the triggering event has occurred via the at least one communication pathway; and
